

Health and vitality are very important for everyone. Many studies show that (non-ionising) radiation - such as the radiation emitted by a mobile phone or a UMTS mast - is a significant contributing factor in ailments such as fatigue, headaches and stress. Given that this is the case, the Floww Company has a single clear objective - to supply high quality products that promote the health and vitality of its customers by protecting them from radiation. The Floww Company has developed a complete range of Floww products that can be attached to your mobile phone, carried in a pocket, or strategically positioned in your home or office. Even people who do not experience adverse effects from exposure to radiation claim to benefit from the use of Floww products. They feel a greater sense of ease and have more energy.

I Physical ailments and excessive sensitivity to radiation

In recent years there have been increasing reports of studies that show the adverse effects of radiation. Some of these studies have even linked radiation to certain illnesses and have suggested, for example, that the use of mobile phones increases the risk of a brain tumour. Other studies show that a growing number of people are excessively sensitive to radiation. In western countries this percentage ranges from 1.5% to as much as 20% of the population.

pocketFloww Woman/Kids

Ailments linked to radiation include:

- chronic fatigue
- stress
- headaches
- lack of concentration
- listlessness
- restlessness (disorders such as ADHD)
- psychological problems (such as depression)

What is radiation?

Radiation is essentially energy that is transmitted in the form of electromagnetic waves or particles. These waves differ in terms of their type, wavelength and frequency (the number of waves per second). The nature, frequency and strength of these different types of radiation determine the extent to which they affect a person's sense of wellbeing.

The following sources of radiation can be experienced as very disturbing:

- GSM and UMTS masts
- high-voltage cables
- power supply systems for trains and trams
- mobile phones
- wireless communication networks (cordless phones, Bluetooth, WiFi)
- computer and television screens
- dimmer switches and lighting transformers in the home

II Floww products

patent pending

1. The general principle

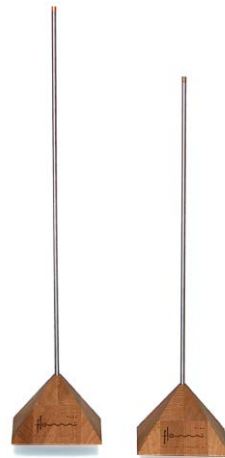

Floww products have been developed in accordance with the principle of resonance. Among other things a Floww product consists of circuits of electronic components that respond to radiation emitted by one or several radiation sources, such as a mobile phone or UMTS tower. The Floww products resonate with the radiation as it were. In doing so the Floww products create a subtle but distinct field that is 'fed' by the radiation source(s). This field, which we call a Floww Field, serves to offset the possibly harmful radiation.

The flowing waves of the Floww Field neutralise the often angular or blocked radiation and in doing so they help to promote and maintain a sense of ease and vitality in the body.

Users generally feel more relaxed. They also experience a greater sense of ease and sleep more deeply. They feel more alive and have more energy. Experts who have tested the Floww products say that the positive effects of the Floww Field can often be felt in the first week and sometimes even from day one.

homeFloww Set

2. Floww products

mobileFloww

The mobileFloww creates a Floww Field around a mobile phone. It is simply stuck on the back of a mobile phone, ideally over the built-in antenna.

screenFloww

The screenFloww creates a Floww Field around a computer screen or (LCD, plasma or conventional) television screen. Ideally the screenFloww should be placed within the 10 cm in front of the screen.

pocketFloww

The pocketFloww is a portable device that creates a Floww Field around the person carrying it. This small device needs to be worn close to the body. It can be carried in a trouser pocket for example. Experts who have tested the pocketFloww have confirmed that placing it under the pillow at night improves the quality of sleep.

homeFloww Set

These five products, which are strategically positioned within the home, work together to create a balanced system throughout the home:

1. geoFloww is placed at the lowest point in the home.
2. bioFloww is placed at the highest point in the home.
3. heatingFloww is attached to the central heating system.
4. electroFloww is attached to the electrical system.
5. aquaFloww is attached to the water supply system.

When the Floww products that make up the homeFloww set are attached to the various systems and supply networks in your home they create a highly effective Floww Field with a range of up to 1,000 m3. It is very easy to install the homeFloww set. Like all of the other Floww products, the homeFloww set comes with clear and detailed instructions.

mobileFloww

officeFloww

For businesses we are able to design a specially tailored Floww system. For more information see our website, www.theflowwcompany.eu, or send an e-mail to info@floww.eu.

3. Prices

Floww product	Price*
1. mobileFloww	€ 49
2. screenFloww	€ 119
3. pocketFloww Woman/Kids	€ 275
4. pocketFloww Man for men and boys over the age of 12	€ 275
5. homeFloww Set	€ 1.250
6. officeFloww	from € 1.750

* All prices include VAT, which applies at a rate of 19%, with the exception of the price of the officeFloww, which does not include VAT.

III To order Floww products

Orders for Floww products can be placed:

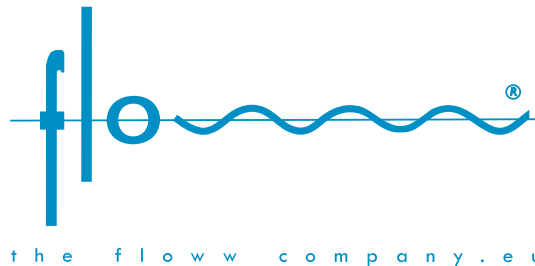

- via our website at www.theflowwcompany.eu
- by e-mail at bestelling@floww.eu
- by telephone on +31 (0) 70 30 30 700

30 day free trial – money back guarantee

Any Floww products can be returned within 30 days for a full refund minus shipping costs. See our website, www.theflowwcompany.eu, for details of the conditions.

IV Literature, links and practical advice on radiation and health

Our website, www.theflowwcompany.eu, contains interesting literature, links to independent websites and practical advice on radiation and health.

As far as possible Floww products are produced, packaged and transported with environment and people friendly materials.

Disclaimer

Floww products are not medical devices. If you have a physical ailment, it is always best to seek medical advice. Floww products should only be used as indicated in the accompanying information supplied by the Floww Company. We also refer you to our General Terms and Conditions, which can be downloaded from our website, www.theflowwcompany.eu, or will be sent to you on request.
